HQ-MKT-HC-005

Unilumin

Providing **Professional LED**
Application Services

Why Choose Unilumin

- Leading in LED display industry exports for **10** consecutive years
- Rapid growth (CAGR **24%**) for 12 years

- Pioneer in the LED industry for **20+** years
- Public listed brand in XShe stock
- Ranks among **Top 500** most valuable brands in Asia

- **The world's largest** LED display manufacturing base of **400,000** sqm
- **1,200,000** sqm LED display annual shipments
- **1,300,000** pcs LED lighting annual shipments

Unilumin is the first enterprise in the LED display industry to achieve TUV SUD low carbon certification

- Grand Slam winner of the International Design Awards
- Full range of products, including display & lighting, multiple production lines and product combinations

- Active countries **160+**
- Serving **10,000+** customers
- Multi-channel model

- Patents: **3,000+**
- Technological upgrade : P0.4 in mass production, **COB/MIP** cutting-edge package , **EBL+** patent tech

- **Unilumin Exclusive Value**
- Full range of industry verticals
- Integrated solution capabilities, with full customisation service

- **20+** Subsidiaries & offices
- **5,000+** employees
- Complete **UCE** training certification

U Headquarters U Subsidiaries & Offices

Professional

UMicro(P0.4/0.6/0.7)
Remarkable to Every Second

- Cool screen:*Micro Chip *EDL+ Tech
- Excellent visual performance:
EBL+*Contrast Ratio up to 30,000:1
- Class B Certificate | TÜV Low Blue Light Certificate

UMiniIII(P0.9/1.1/1.2/1.5)
Mini, the New Max

- Mini Chip | Cool screen
- EBL+* Contrast up to 20000:1 | 1200nits
- Class B Certificate | TÜV Low Blue Light Certificate

UMini W(P0.7/0.9/1.2/1.5/1.8)
Brand New Mini Product

- Mini Chip | Cool screen
- EBL+* Contrast up to 12000:1 | 800nits
- Class A Certificate | TÜV Low Blue Light Certificate

UpanelII MIP(P0.9/1.2/1.5)
Illuminate Your Vision with unrivaled Clarity

- Clean visuals and lifelike color
- Cordless connection between cabinets
- Excellent visual performance
- Module surface 3+7 protections

UslimIII MIP(P1.5/1.9/2.5)
Creative Indoor and Semi-outdoor LED Display

- Three standard sizes of cabinets for different creative shapes such as Round-corner Square, Wave concave and convex arcs etc.
- EBL+ Patented Technology: contrast ratio of 8000:1, displaying more details.
- Ultra Energy Saving: Common Cathode & Flip-Chip LED (CCF)
- Surface light source: Better Protections for eyes.

Udesign SV(P3.91/6.25)
Creating a new Era of Indoor Commercial Display

- Up to 95% high transparency
- Upgraded visual performance
- Low maintenance cost with modular design, easy to take out single strip

UVF(P2.6/3.9/7.8/10.4)
Thin & Slim Design for Indoor Transparent Screen

- Extreme light&transparent design - 8kg/m², 50% of Transparency
- Unlimited creativity for irregular design
- Front/Rear maintenance design

Commercial – Outdoor

ULWIII Pro(P0.9/1.2/1.5/1.8/2.5)
First Automatic Production NPP LED Display

- Fully automatic production line, 7days fast delivery
- Fully front and rear installation&maintenance, adapt more on-site installation requirements
- High integration system, 2 in 1 HUB, more stable
- Front installation&maintenance, adapt more on-site installation requirements
- Creative design, right angles, Support up to 20° inner curves*

ULWIII MIP Pro(P0.9/1.2/1.5)
First Automatic Production NPP LED Display

- EBL+ patented technology: deeper contrast, displaying more details
- Integrated and internal cableless Design: Stable Transmission
- Energy saving: common cathode & flip-chip LED (CCF)
- Excellent side view color consistency: Vivid images
- Surface light source: better protections for eyes

UsurfaceIII(P6.67/8.33/10)
Pioneering SMD 10,000nit Outdoor LED Screen

- Ultra High brightness up to 10,000nits(SMD)
- High contrast ratio – better viewing effect with less sunlight reflecting on the surface
- Good heat dissipation -5°C lower than normal module
- Front or rear maintenance optional

Usurface PL1(P6.25/7.81/10.4)
Advertising with No Boundaries

- Cost-saving for Structure with 21.5KG/m² of light weight
- High Utility with 1*1 meter size.
- Reduce 15% of energy consumption by DVPS new tech. (150-200w/m² avg. consumption under 7500nits)

USK(P2.6/2.9/3.9/4.8/5.9)
Natural Image, Stable Operation

- IP69K, Worry-free under High Temperature or High Humidity environment.
- Reduce 40% of energy consumption by DVPS new tech.
- Meet EMC Class B certification(Civilian Standard)

Usurface GM(P5.71/6.67/8/10)
Stay Cool and Shining

- Increased heat dissipation efficiency by 10% through the die-casting aluminum back cover
- High protection of IP66/IP65 and 5VB Flame-retardant rate
- Energy saving circuit design: Lower operating cost and higher rate of return
- Low luminance decay*: Below 30% of luminance decay after 5 years
- Convenient Front&Rear installation/maintenance

Commercial – Indoor

U-Natural(P0.6-2.6)
Turn off the Display, Turn on the Art

- Provide diversified design of surface texture effects
- Scratch-resistant up to 3H
- Seamless mapping

Uslim S2(P1.8/2.5/3.9)
Indoor Ultra-thin Double-side LED Display

- Double-sided display (indoor 800-1,000nits, semi-outdoor 3,000nits)
- Common cathode, and energy saving
- Intelligent operation and maintenance
- Working status monitoring, stable and safe

UslimII(P1.5/1.8/2.5/3.2/3.9/4.8)
Ease of Creation with Standard Product
—Visualization Reinvented in Commercial Spaces

- Impressive viewing experience
- Intelligent operation & maintenance control
- Various creative shapes
- User-friendly design

UslimIII(P1.5/1.9/2.5/3.9)
Integrated & Creative Indoor LED Display
—Unlock Visions, Unleash Creativity

- Ideal for indoor and semi-outdoor use
- 5760Hz refresh rate for an impressive experience
- Front & rear installation/maintenance
- Integrated Design: Resilient and stable
- Customizable Splicing: Flexible and creative configurations
- Dust-Resistant Surface: Ensures clarity and performance

O(1531/2525/2550)

- Better resistance against wind with high transparency up to 72%
- High security - integrated design for PSU and Signal
- Professional for Outdoor Use with IP67 and 10,000nits high brightness

VT(1825/1831/1525/1531/8031)

- Vivid visual experience with reaching 60Hz, 16bit
- First choice for Irregular design

F-M(P3.9-10.4)

- Extreme light&transparent design - 15kg/m², 50% of Transparency
- High security - IP65, Integrated modular design

Rental

UpadIV(P1.5/1.9/2.6)
Create Value, Continuously

- Ultra lightweight – die-cast magnesium design, weighs only 6.3Kg
- Brilliant visual performance-DDC (dual drive configuration)technology & HDR technology
- Automatic hanging lock – one-person installation, disassembly and maintenance
- Flexible curve lock – high precision arc block
- Creative display – "S" shape, cylinder, rounded corner, cube and square corner

URMIII (Indoor P1.9/2.6/2.9/3.9)
(Outdoor P2.9/3.9/4.8/5.9/7.8)
Ease of Use

- True single-person installation – automatic lock design, excellent safety performance
- Pinch n' go module – high efficiency of screen maintenance
- 3D corner protection – protect the screen from damage
- Creative installation – 90° corner, curve and creative shapes

UGMII (Indoor P2.6/2.9/3.9)
(Outdoor P3.9/4.8)
All Usability in One

- Cost-saving with 20% lighter and thinner
- Unlimited creativity supporting flexible, curve(±10°), corner and six-sided design with customized cabinets

UGNII (P1.2/1.5/1.9/2.6)
HD Meets Creativity

- Detachable lock design – quick shift of cabinet models
- High flexibility – with no limited shapes, for endless imagination
- Real one-person installation – for fewer labor costs and great convenience
- Stable performance – effective protection and backup

Utile EA(P2.6/2.9/3/03)
Lightweight but Robust

- -10°~ +10° wide range curving supports various splicing designs
- Support splicing with cube and flexible cabinet, making every creativity possible.
- Visualized locating Installation for better aligning experience
- Independent modular design-for easier maintenance

XV(P3.9-7.8)
Simplify your imagination

- Keep perfect visual performance while maintaining high transparency
- Allow more lights come through with high Visual Transparency Angle
- Ensure excellent durability and reliability with IP65 protection
- Unlock creativity with ±15° ultra-wide curving and diverse installation methods

UpadIV HB(P3.9/4.8/5.9/7.8)
Embrace Bigger Touring Stage

- Unprecedented Visual Effects
- Sophisticated Touring System
- Steady Display Performance
- Friendly Electricity System

UpadIV ME(P7.8)
Visible or Invisible, We are Capable

- Stunning Visual Effects
- Light but Robust Structure
- Reliable Touring System
- Cables & Parameter & Application Scenarios

XF(P2.9)
Purpose-designed Floor Display

- Stunning bearing load, up to 2.5T/m²
- Special bevel edge design for stage elevation.
- Multiple sealed protection.

UCINE

- High definition, high refresh rate
- High brightness and color consistency
- Excellent contrast performance
- High grayscale
- Cinema LED system combined with video processor

UTV Series

UTV SC(108", 135", 162"U)
Unilumin COB All-in-one

- Full flip chip COB
- Common cathode design
- EBL+ Multilayer optical processing technology

UTV W(135", 162")
Unilumin SMD All-in-one

- Hidden wiring design
- Hollow out design for efficient heat dissipation
- Two in one design for receiving cards and HUB cards

Usport

UsportX(P6.25/8.33/10/12.5)
Outdoor LED Perimeter Display

- 6,000nits brightness & 7,680Hz refresh rate
- Double sides IP65 protection grade
- Silicon soft mask + rubber protective pad + adjustable support frame, protect players and screen
- Meet FIFA/UEFA international competition standard

UsportR(P6.67/8.33/10)
Outdoor LED Ribbon Display

- Extremely stable with system redundancy
- Ultra-high installation accuracy
- Convenient installation & maintenance
- Efficient heat dissipation

UsportMAII(P3.9/4.8)
Gymnasium Cube Display Solution

- Top-class Immersive Viewing Experience with Dynamic HDR Technology
- Ultra Clear Image with 7680 Refresh Rate
- Enjoy events with No Visual Dead Zones
- Reliable with Ultra-high Stability
- Convenient Installation and Maintenance

Unilumin
Distribution

Umate PN(P1.2/1.5/1.8)
Fully Automatic & Highly Integrated Professional NPP

- Automated production, excellent precision, higher efficiency
- No cable inside, receiving card and hub 2-in-1 design
- XYZ axis six-way adjustment for better flatness
- Support inner curve, right angle, half cabinet
- Support power supply and signal dual back-up

Umate LM(P1.9/2.5/3.9)
Flexible in Size, Applicable for All

- 3 size cabinets mixed splicing, free to create
- Cabinet rotation usage without color bias
- Semi-outdoor high brightness optional
- Cable-less inside cabinet

Umate SF(P4/6/8/10)
Strong and Stable for Outdoor Display

- High performance advertising potential - 6000-10000nits high brightness, 3840Hz high refresh
- Stable and continuous - Front&Rear IP65, Hidden alignment design, Die-cast cabinet
- Efficient maintenance - Front&Rear Maintenance, weighs 23kg/panel, Dual handles
- Wide range of applications - Right angle solution, Perfect rounded corners

UMini P(P0.9/1.2/1.5/1.8)
RGB fully flip chip plus energy saving technology, keeps low carbon emissions

- Highly integrated 3-in-1 design for power supply, receiving card and HUB card, highly efficient signal transmission
- Light and slim panel design
- Multiple protections for moisture-proof, dust-proof, anti-static, anti-collision

UDAII (P1.2/1.5/1.8/2/2.5)

- 4200Hz high refresh rate, vivid visual experience
- Anti-collision design provides comprehensive protection to keep the LED lamp, pad, PCB from damage during delivery and splicing
- Efficient heat dissipation, 5°C lower than conventional LED display
- Easy real-time monitoring of operating status

UMicro

Remarkable to Every Second

- Displays more vivid and detailed content with 30000:1 super high contrast
- EDL technology for ultra-high consistency of grayscale in the low brightness environment
- Accurately present each image in its original color across 3D-LUT calibration technology
- Extremely comfortable experience enhanced by eye protection, cool screen and user-level safety design
- Utilize the most energy-efficient technology in use and standby to make every watt count

APPLICATIONS

Model	UMicro 0.4	UMicro 0.6	UMicro 0.7
Pixel Pitch	0.4mm	0.6mm	0.7mm
Pixel configuration	1R1G1B		
LED type	Fully flip chip COB		
Pixel density(pixels /m²)	4551111	2560000	1638400
Pixels per panel	1280x720	960x540	768x432
Cabinet size (WxHxD)(mm)	W600×H337.5×D40

Input Power/Panel <Avg>	≤55 W	≤38 W/≤52 W	≤35 W/≤45 W
Storage temperature & humidity(°C/RH)	-10°C~+55°C/ 10~85% RH		
Operation temperature & humidity(°C/RH)	-10°C~+45°C/ 10~80% RH		

Micro-pitch display with incredible 4K picture quality Unique technologies for unparalleled user experience

- EBL EBL+ Technology
- EDL EDL Technology
- 3DL 3D LUT
- Comfortable use experience
- 5G 5G Transmission
- Maximum Energy-saving

Super High Contrast

UMicro adopts Unilumin's unique **EBL+(Enhance black level+)** and **multi-layer optical processing technology**, which can display the ultimate pure black contents with 30000:1 super high contrast

- Super black background
- 30000:1 Super high contrast*
- Super soft display
- Ultra-low moiré
- Ultra-low reflectance
- Ultra low touch trace

* : support

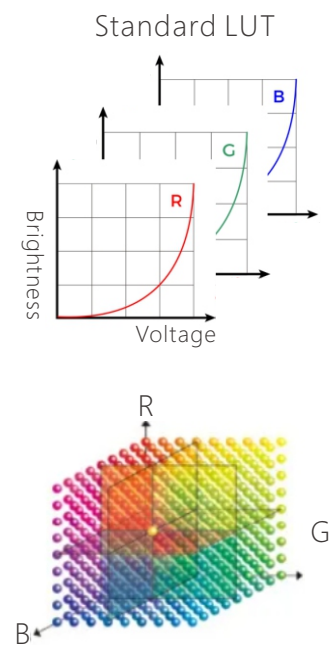

Each Pixel Matters - Ultra-high Consistency

UMicro features **EDL(Enhance Drive Level) technology** to improve consistency of the grayscale on the display and effectively solve the heat dissipation problems of micro-pitch LED displays

- Low temperature rise
- Ultra high consistency
- No flickering
- Low power consumption
- No high-contrast coupling issues

True Color Presentation with 3D-LUT

Exact color representation is important, and 3D-LUT technology makes it possible, which allows UMicro to accurately present each image in its original color across the screen.

High-precision
gamut transfer

DCI-P3 color
gamut

High
saturation

Superb Visibility with High Brightness

UMicro supports ultra-high brightness* to adapt to diverse environments, so the visual experience will not be affected, even if it is directly illuminated by bright lights.

* : support

5G Ultra-large Signal Transmission*

Streamlined Hardware
Equipment

Fast Data Transmission &
Large Load Capacity

UMicro utilizes 5G ultra-large signal transmission technology, which ensures the data transmission speed is four times faster than traditional LED display for larger load capacity. In addition, the hardware equipment is more streamlined to facilitate easy installation.

* : support

HD Dynamic Picture Quality Transmission

UMicro supports high frame rate applications of 120HZ which makes the display content smoother*

* : support

"Cool"Screen

UMicro adopts unique energy-efficient & heat-dissipation technology to keep a low temperature for a better user experience, even during long periods with high brightness. (Eg. With 25°C ambient temperature, the front screen temperature of UMicro.7 with 600nits is approx. 37°C)

RGB flip chip

Dynamic energy saving

Common cathode design

One-click sleep

* : UMicro 0.7 compared with conventional 0.7 pixel pitch products

Secure Use Experience

c UL US
LISTED

C UL US LISTED Certification

Qualified EMC Class B, UMicro's anti-interference is consumer level. In addition, C UL US LISTED certification provides confidence that UMicro was designed with all safety considerations while providing the most captivating imagery possible.

Comprehensive Eye Protection

Utilizing multiple technologies to minimize health hazards caused by long-term use of the screen, UMicro has been certified by TÜV Rheinland for its visual comfort display performance

Area light source design,
reduce negative effects on eyes

Nano-optical materials with
diffusion process ensures uniform
light and filter out stray light

Best-in-class LEDs ensure less
than 5% harmful blue rays.

UMiniIII

Mini, the New Max

- Impressive viewing experience and dazzling color with 20000:1 super high contrast, 3D-LUT color gamut calibration technology
- Extremely comfortable experience enhanced by eye protection, cold screen and user-level safety design
- Energy-saving technology in use & standby
- Convenient operation and maintenance

Super High Contrast

- EBL+ technology and multi-layer optical processing technology
- 20000:1 high contrast

Ultra-high Consistency Effect

- Low temperature rise
- Ultra high consistency
- No flickering
- No high-contrast coupling issues
- Low power consumption

Low Power Consumption

UMiniIII adopts the latest energy-saving technology, it can achieve maximum energy-saving effect whether in use or in standby

- RGB flip chip
- Dynamic energy saving
- Common cathode design
- One-click sleep

All-round Protection

- 3H protection
- Dust-proof
- Moisture-proof

UMini W

Brand New Mini Product

- EBL+: Contrast up to 12000:1 | 800nits
- Only 4kg weight and 29.6mm thickness per cabinet, easy and efficient transportation and installation
- Comprehensive eye protection with fewer blue ray hazards
- Maximum energy-saving performance, comfortable cool screen experience
- Ultra-high level of protection, greatly reduce damages caused by collision and harsh environments
- Flexible design possibilities of curving, corner, and half-size panel

Clean Visuals and Lifelike Color

Modules

- Common Cathode & Full flipped chips (CCF)*
- Module cordless connection with HUB

Delicate cabinet design

- LCD monitor displaying Power & Signal status
- User friendly handle design

*Except UpanelII 2.5

Cordless connection between cabinets

Power and Signal connector

- Stable transmission
- Mess-free

Power and Signal Connector extended

Images simulated for illustrative purposes, not actual installation process

MIP Technology Advantages

- **Micro chip package**: pixel-level binning, significantly enhances large viewing angle/ black and white screen consistency and uniformity.
- **Common Cathode & Flip-Chip (CCF)**, ultra-high stability, high luminous efficiency, low power consumption. Saves around 40%-60% compared with traditional SMD.
- **COB optical processing** with surface light source, better eye care.

Excellent Visual Performance

EBL+ (Enhance black level+) Multiple optical Processing

Adopt multilayer nano-optical material, high contrast ratio, presenting extremely deep black visual with no reflections

Ultra-high consistency over 99%

- Self-developed package
- Pixel-level binning

Wide viewing angle without color cast

- 180° horizontal wide viewing angle

Brilliant performance

- High contrast ratio
- 7680Hz Refresh rate*
- Support HDR display*
- Support low scan rate*

*optional

Globally Certified

One-Button Control (Optional)

Chip Level Package

- Pixel-level binning
- High consistency over 99%
- 180° wide viewing angle without color cast

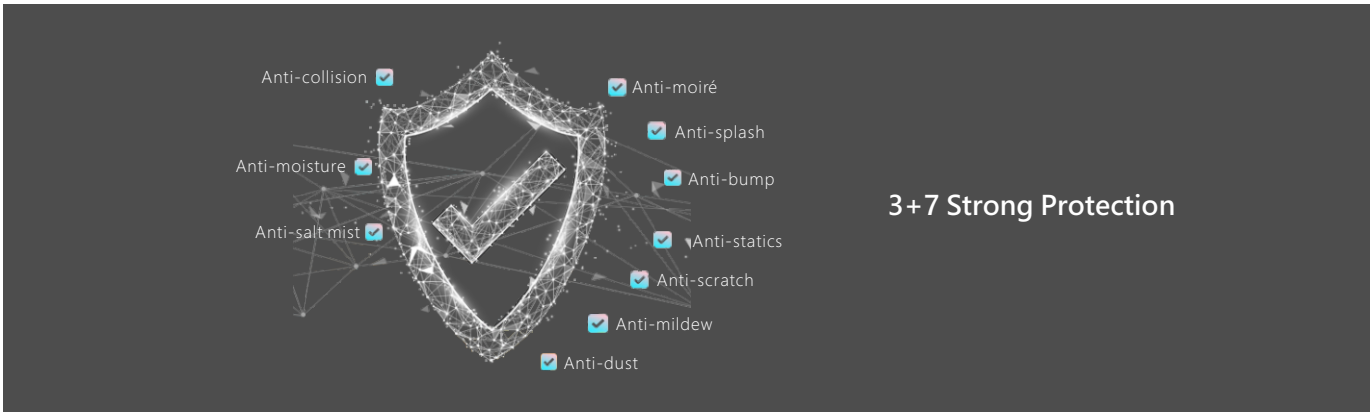

EBL+ Patented Surface Process

- Multi-layer nano-optical Processing technology
- Pure black | Soft display
- Low reflection
- Low touch trace | Low Moiré

Full Flip Chip MIP

- No welding wire, high stability and longer life-span
- RGB full flip chip, reliability increased by 50%
- Common cathode energy-saving design, higher light efficiency

Multicolored **Artistic** Decorative

STANDARD TEXTURE PATTERN

Provide diversified design of surface texture effects

Through Unilumin's patented micro-nano optical design, processing, and material solutions, U-Natural achieves an effect of screen-off textured decoration based on COB/MIP products without affecting normal display performance.

LED module

COB/MIP EBL
The Nano-optical Solution

Protective Coating

U-Natural

The nano- optical layer is natively integrated with Unilumin's COB/MIP technology.

3H

Scratch-resistant

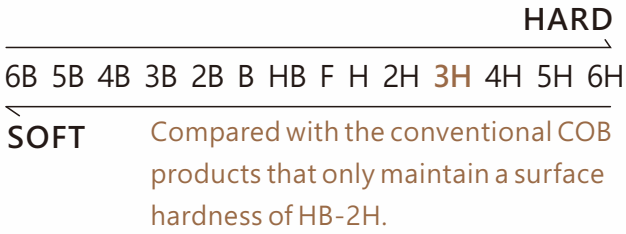

110°

Dust-proof

0.5%

Low Reflectivity

Scratch-resistant

The surface hardness of 3H means that the film surface can resist scratching by a 3H - hardness pencil with a force of 1 kg applied at an angle of 45 degrees.

Dust-proof

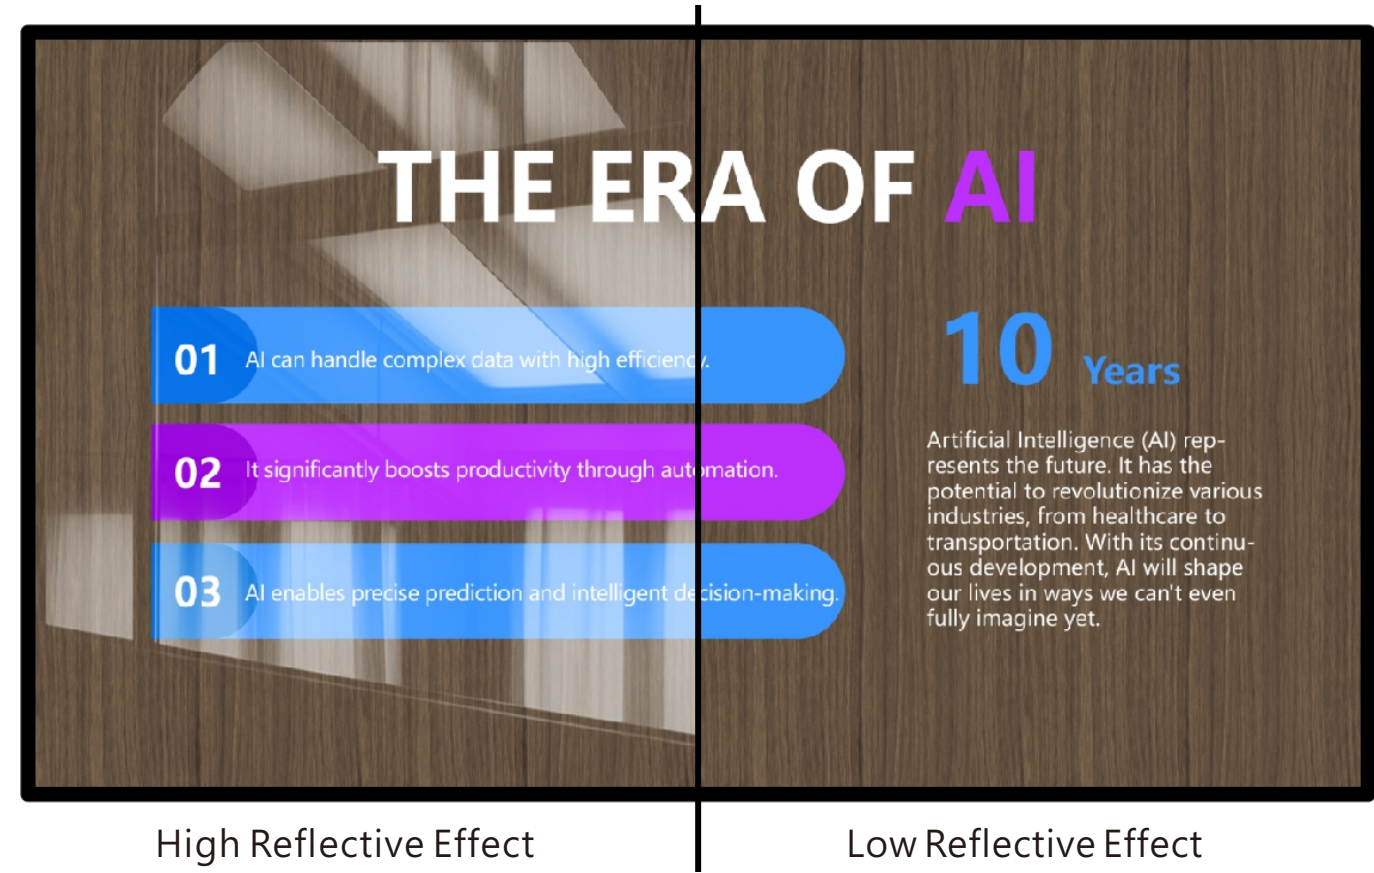

Water Contact Angle $\geq 110^\circ$

It indicates that the product has excellent hydrophobic and dustproof performance.

Low Reflectivity

Note: When light enters the surface of the module vertically, only 0.5% of the light is reflected.

Seamless Mapping

It can make the texture connection relatively natural and bridge the physical separation.

Customize Your Pattern Texture

Customizable tile patterns are available with the size of the module as the unit.

The scope of customization needs to be confirmed with Unilumin's R & D department.

APPLICATION SCENARIO

Space Decoration

Restaurant

Uslim S2

Indoor Ultra-thin Double-side LED Display

- Double-side independent display
- Impressive viewing experience
- Anti-loosing design on components & anti-falling design on module
- Support power delayed start
- Common cathode design & one-click sleep mode for energy-saving
- Half the thickness of conventional double-side display
- Self-locking for fast splicing, support hanging and stacking installation

APPLICATIONS

UOS System-Double Brightness & Double Contrast Effect

The UOS system supports doubling the peak brightness and doubling the contrast through intelligent recognition of the screen without changing the electric current of the entire screen. The contrast between the brightness and darkness of the screen is more prominent and the colors are more vivid.

UOS System-Ultra High Definition Display

The UOS system not only supports HDR effects, but also has the function of transforming ordinary SDR video sources into HDR display effects which greatly saving costs.

Various Creative Shapes

UslimIII MIP

Creative LED Display For Indoor & Semi-outdoor

- Three standard sizes of cabinets for different creative shapes such as round-corner square, wave concave and convex arcs, etc.
- EBL+ Patented Technology: Brings a higher contrast ratio of 8,000:1, displaying more details
- EBL+ & 3+6 Protections: Resilient and Stable
- Ultra Energy Saving: Common Cathode & Flip-Chip LED (CCF)
- Surface Light Source: Better Protections for eyes

Where You Can Use UVF

Shopping Centers

Installed on glass walls, atriums, elevators & railings. The perfect transparency enables daylight to come in while retaining the architectural structure. Transform the static walls into transparent screens showing unique and dynamic 3D images, enhancing the shopping atmosphere.

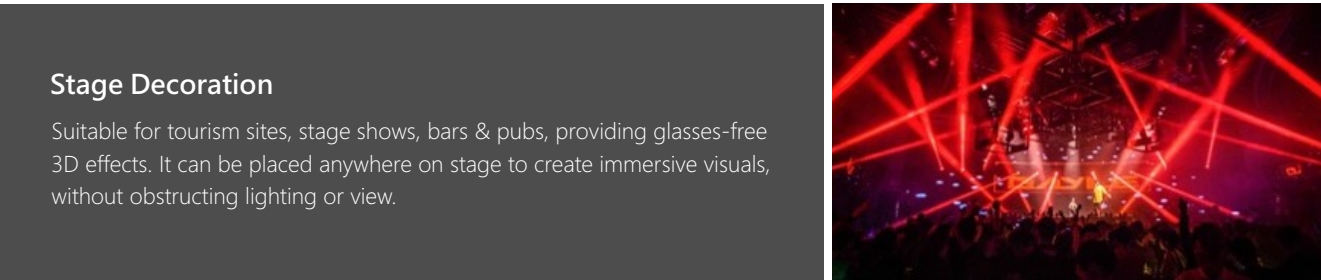

Chain Stores

Used for electronics stores, banks, coffee shops & jewelry store windows. Function as display window media, let in daylight without changing the original design. Enable creative interactions to draw customers and boost sales.

Advertising Media

Applied to glass walls, windows, and interior spaces in railway, subway, and bus stations. Create impactful ad platforms with high value, without affecting daylighting or architectural design.

Stage Decoration

Suitable for tourism sites, stage shows, bars & pubs, providing glasses-free 3D effects. It can be placed anywhere on stage to create immersive visuals, without obstructing lighting or view.

UsurfaceIII

Pioneering SMD 10,000nits Outdoor LED Screen

- Super brightness – SMD 10,000 nits
- High contrast ratio – better viewing effect with less sunlight reflecting on the surface
- Wider viewing angle – realize large-scale visibility
- Front or rear maintenance

APPLICATIONS

Model	UsurfaceIII 6	UsurfaceIII 8	UsurfaceIII 10
Pixel Pitch	6.67mm	8.33mm	10mm

Super Brightness by SMD 10,000nits

Super Brightness by SMD 10,000nits

Wider Viewing Angle

Compared with average DIP LED panels, SMD based UsurfaceIII enables bigger exposure thanks to larger viewing angle

Excellent Outdoor Performance

Front / Rear Maintenance optional

Cost Saving

Usurface PL1

Advertising with No Boundaries

- Maximize advertising value with seamless 100% billboard coverage
- Create captivating advertisements with high brightness and refresh rate
- Save energy via DVPS technology and common cathode design
- Simplify installation and maintenance with ultra-light, ultra-thin design and front & rear maintenance

APPLICATIONS

Model	Usurface PL1 6.25	Usurface PL1 7.81	Usurface PL1 10.4
Pixel Pitch	6.25mm	7.81mm	10.4mm
Pixel Density	25,600 pixels/m²	16,384 pixels/m²	10,000 pixels/m²
Panel Resolution	80×40 Dots	64×32 Dots	48×24 Dots
Panel Size (W×H×D)	1000×1000×62mm		
Material	Profile Aluminum		
Brightness	7,500 cd/m²		
Ingress Protection	IP65		
Maintenance	Front & Rear		
Viewing Angle(°)	160°/100°		
Input voltage(V)	100~240 V		
Weight	23.5kg/m²		
Contrast Ratio	8000:1	9000:1	10000:1
Input Power <Max>	650 W/m²		
Input Power <Avg>	217 W/m²		
Storage temperature & humidity(°C/RH)	-30°C to 60°C/10% - 80% RH		
Operation temperature & humidity(°C/RH)	-30°C ~ +60°C (-40°C optional)/10~80%RH		

LED Billboard Redefined – Covering Every Inch

Conventional displays are not perfect for most billboards because of size constraints. However, with its 1000mm x 1000mm dimensions, the Usurface PL1 can achieve seamless 100% coverage and maximizes your advertising value.

Lighter, Thinner, and Cost-Effective

- Aluminum profile cabinet
- Ultra-light and thin: 21.5 kg/m², 62mm thickness
- 37% ↓ less weight than others
- Save 1,950 kg ↓ of steel structure (per 100m²)

Ultimate Energy-Saving Performance

Usurface PL1

Avg. Consumption: 150~200 W/m²
Max. Consumption: 450~600 W/m²

Conventional Display

Avg. Consumption: 172~230 W/m²
Max. Consumption: 516~690 W/m²

15% Energy Saving

Hassle-free Front & Rear Maintenance

Front Maintenance

Rear Maintenance

USK

Natural Image, Stable Operation

- Best-in-class visual experience with high brightness, contrast ratio, and refresh rate
- Carefree operation with comprehensive protection designs and high stability
- High flexibility with no limited shapes to get more business opportunities
- Latest DVPS technology ensures up to 40% energy-saving cost and low carbon emission
- EMC Class B design for no electromagnetic interference to other devices or affected by others

APPLICATIONS

Model	USK 2.6	USK 2.9	USK 3.9	USK 4.8	USK 5.9

Darker! Brighter!

Ultra Clear Image with 7680 Refresh Rate

USK support 7680Hz refresh rate, ensuring a more realistic and smoother visual experience with no ghosting and visible scan-lines

Keep the Ads Perfectly Rendered at Any Time

- Day and night dual program to ensure that the grayscale will not be lost when the brightness is reduced at night
- Mode switching is easily achieved in one second
- The timing switch function is under development*

Ultra-wide Viewing Angle

Ultra-wide viewing angle **160°/140°**, bringing all-round advertising to media clients and improving user perception

Creative Installation

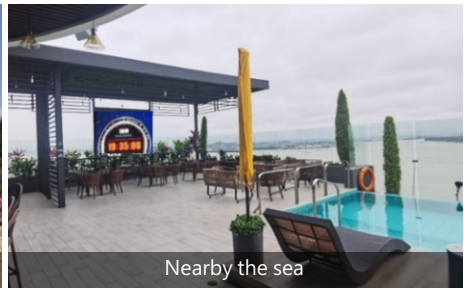

The cabinet has a 45° design, which can easily match the needs of different scenarios.

Die-cast Aluminum Cabinet, Unaffected by Salt Spray

Beach

Nearby the sea

- Die-cast aluminum housing
- Surface spraying processing
- Electrophoresis processing

Adopt reliable die-casting aluminum housing and multiple special processing, USK can easily meet the protection needs of coastal areas, beaches, swimming pools, etc., without fear of salt spray environment erosion.

Hassle-free Front & Rear Maintenance

USK supports front & rear installation and maintenance, flexible installation and use.

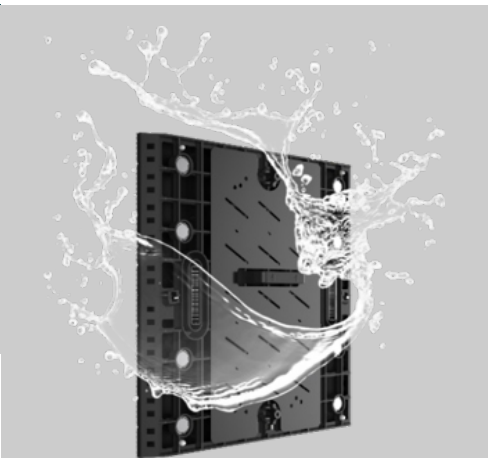

Efficient Heat Dissipation Design

With innovative heat dissipation designs, USK can effectively reduce external environmental and internal thermal effects to keep it operating at normal temperatures.

- Large rear cover
- Double-sided gluing design
- Sunshade design

IP69K Protection — Superior Waterproof Performance

Compared with IP65, IP69K is a higher dimension protection test, which is closer to the real application of outdoor display screens, so customers don't need to worry about USK's operation status.

IP69K Test*

Water temperature: 80°C±5°C	Water pressure: 80~100 bar	Water flow rate: 14~16L/min
Water spray distance: 10~15cm	Water spraying angle: 0°, 30°, 60°, 90°	Water spraying time: 30 seconds per angle

*Test standard: hot vapour washout test as defined in EN 60529 and DIN 40050-9.

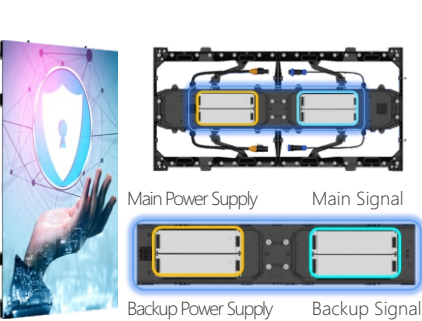

EMC Class B Design

Based on the excellent circuit design, USK can meet the electromagnetic requirements of **EMC Class B for a single cabinet**. USK can not only operate without causing electromagnetic interference to other equipment in its environment but also can not be adversely affected by other devices.

Power & Data Redundancy*

The ample internal space allows USK to support power & data redundancy so that USK can maintain ultra-stable operations.

*Optional

Remote Monitoring of LED Screen Status*

- Smoke Monitoring
- Module Signal Monitoring
- Module Voltage Monitoring
- Spot Detection Function
- Humidity Monitoring
- Module Temperature Monitoring

*Optional

DVPS Energy-saving Technology

Compared to conventional 5V power supplies*

Equipped with the latest DVPS energy-saving technology, USK consumes less electricity and produces fewer carbon emissions than conventional 5V power supplies, ensuring a higher return on investment for customers and outdoor media.

*Test standard: 3.9 pitch, 100m2, 12H/day, continuous operation for 365 days.
*Compared with conventional 4.2V power supplies, the power consumption is reduced by 16%

Usurface GM

Stay Cool and Shining

- Die-casting Aluminum back cover: Heat dissipation efficiency increased by 10%
- High Safety and Stability: IP66/IP65 and 5VB Flame-retardant rate
- Energy saving circuit design: Lower operating cost and higher rate of return
- Low luminance decay*: Below 30% of luminance decay after 5 years
- Convenient installation/maintenance: support both Front and Rear

Operation temperature & humidity(°C/RH)	-20°C~+50°C/10~90%RH	

Long-Lasting Ultra High brightness

- **7,500~10,000nits**
Outstanding visibility in the brightest outdoor environments
 - **7680Hz, 13,000:1 Contrast**
More vivid and realistic, maximizing the inherent value of the advertising content
 - **Below 35% of luminance decay after 5 years***
Carefully selected LED chips for longer service life while maintaining high quality display performance
- *Optional

Panel Protection Design

Rain shield design on top of PSU box

Module surface potting

IP66/IP65 ensures stability in harsh environments, reducing faults occurrence by environment

Fully sealed aluminum chassis

Coating on module & Hub

Panel Protection Design

Flexible installation and maintenance-
Front & Rear Access, 4PCS knobs for fixing each module, convenient and fast

Invisible cables and wiring

- Nice and Tidy:**
- Hidden cables and wiring in product frame
- Safe and Stable:**
- Reduce water accumulation
 - Slows down cable and wiring aging
 - Away reaching from animals and birds

O Series

- Integrated Module Design**
Built-in power and data processor for one-line connection and easy cable management
- High Brightness & Low Power Consumption**
While maintaining high brightness of 7500-10000nit, the average power consumption is only 100-140 w/m²
- Front Ventilation**
Front ventilation system has air intake and exhaust
- Convenient Installation**
Free of steel frame structure, adapt to various types of buildings

Lighter, Die-cast magnesium Design

The die-cast magnesium cabinet weighs only 6.3kg, 30% lighter than average.

Transportation Protection

High strength flight case

Module Protection

Moveable safety rope design

Handling Cover

Foam sheath

Installation Protection

Automatic edge protection & effective corner protection

DDC Technology (Dual Drive Configuration)

Two modes by one switch, One screen for dual uses

High light mode

In general, the picture goes blurry with 10% of reduction in brightness.

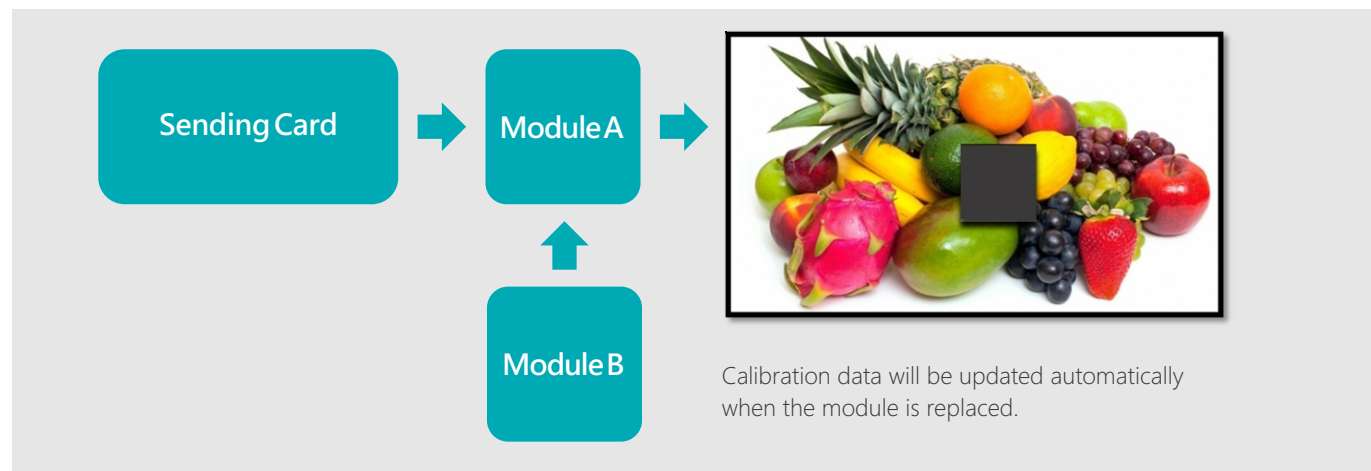

Low light mode

HDR Technology

High resolution 16bit, high gray level, support 10bit video

Automatic Calibration

Lighter, Die-casting magnesium Design

Mobile Control Solution

For small-sized exhibitions.

URMIII

Ease of Use

- True single-person installation – automatic lock design, excellent safety performance
- Pinch n' go module – high efficiency of screen maintenance
- 3D corner protection – protect the screen from damage
- Creative installation – 90° corner, curve and creative shapes

APPLICATIONS

Lightweight

Click-lock True Single-person Installation

- Click to pop up the King PIN ;
- Complete the lock by touching the upper and lower modules ;
- Reinforce the lock in one click.

Curve Function

Support to custom curve cabinet for various angles (including -10°, -7.5°, -5°, -2.5°, 0°, 2.5°, 5°, 7.5°, 10°) ;

Flip-shield Corner Protection

Lowering the collisions risk of the lamp face during transportation.

Note: corner protection is optional

Antil-scratch Protection of The Lamp Face

- The salient point design of the mask enhances the crashworthiness of the module surface;
- Lamp pin dispensing process makes thrust strengthened ;
- Reduce the maintenance cost of the lamp;

ABS Technology (Advanced Backup Sharing)

Quickly solve the power failure of the power box without disassembly. When a power failure, power cord failure or aviation plug failure occurs, the adjacent cabinets will share the output current to make the screen display normally.

Note :
1. ABS technology is optional;
2. The realization of the ABS function needs the connection of current sharing backup line.

Rear Maintenance Module
Compatible modules between 500*500 and 500*1000 cabinets;

Comfortable Big Handle
Convenient to grasp and move;

Interdependent Power Box Design
Modular design of power box for fast-switch service;

Note: UGM II 500*500mm and 500*1000mm power supply box are not compatible.

UGNII HD Meets Creativity

- Detachable lock design-quick shift of cabinet models
- High flexibility with no limited shapes -realize your endless imagination
- Real one-person installation for fewer labor costs and more convenience
- Carefree-level stability- operation with high protection and stability

Standard Mounting Configuration	Hanging, Stacking			

Bright Star

Unprecedented Visual Effects

Robust Transformer

Sophisticated Touring System

Reliable Partner

Steady Display Performance

Effective Safeguard

Friendly Electricity System

Exceptional Performance in Strong Sunlight

- 5,000nits brightness (10,000nits for HB07)

- 8,000:1 contrast ratio

- Black SMD for HB03/04
The screen is clear and sharp, shining like a diamond in the sun.

Cinema-grade Display Effects

7680 Hz and a large grayscale of 14 bits for the whole series

UpadIV HB reproduces smooth and subtle gradations of light and shade, immersing the audience in unforgettable visual experiences.

UpadIV HB

Conventional

Superior Strength

Versatile Wind-bracing Frame

- **Foldable:** you can save space for transportation and storage
- **Detachable:** you can take down the independent frames from the panels when there is no need
- **Climbable:** you can climb the frames behind the panels for fast maintenance

Efficient Touring Dolly

The two covers and floor of every dolly can be stacked for storage, to help you save the space and cost.

Stacked Covers for Storage

Stacked Floors for Storage

Curve Installation

Fast Rear Maintenance -- Pinch n' Go Module

Modular Power and Signal Box

Dynamic Energy-saving

UpadIV ME

Visible and Invisible, We are Capable

- Jaw-dropping Display Effects – high refresh rate of 7680Hz and large grayscale of 14 bits
- Higher levels of transparency – up to 50%
- Reliable Touring System – maximum hanging height of 24 meters
- Wide Curve Range – from (Convex) -15° to 15°(Concave), 2.5° per unit

APPLICATIONS

Carnival

Concerts

Music Festival

Model	UpadIV ME07	
Pixel Pitch	7.8mm	
LED type	3-in-1 SMD	
Panel Size (W×H×D)	1000 × 1000 × 103 mm	39.37" × 39.37" × 4.06"
Panel Resolution	128 x 128	
Curve (Convex - Concave)	-15° ~ +15°	
Ingress Protection	IP65	
Maintenance	Rear	
Brightness (cd/m²)	5,000 cd/m²	
Viewing Angle(°)	140°/120°	
Input voltage(V)	100~240 V	
Panel Weight	18.7kg, 24kg(with wind-bracing frame)	
Contrast Ratio	4000:1	
Gray Scale	14bit	
Refresh Rate	3840Hz	
Input Power/Panel (Max/Avg)	510/170W	
Standard Mounting Configuration	Hanging, Stacking	

Stunning Visual Effects

Light but Robust Structure

Reliable Touring System

Jaw-dropping Display Effects

High refresh rate of **3,840 Hz** and a large grayscale of **14 bits**, UpadIV ME represents clear and smooth pictures, for creative and interactive display solutions.

Gray Level

UpadIV HB

Conventional

Ultra-high Transparency

Transparency up to **50%** without compromising image quality and the broadcast of sound behind the stage, looks simple, neat, and high-grade.

Lighter

UpadIV ME07 weighs lighter
22% than its conventional counterparts.

Robust Structure

Two strong and telescopic hanging locks

- One panel with 2 strong hanging locks
- More robust and easier to positioning
- Telescopic design for convenient pulling back, to avoid the pin's light reflection on the stage

Curve Installation

Curve Range:
(Convex) -15°~+15°(Concave), 2.5°
per unit, practical for more scenarios

Handle of Curve Lock:
vertical and streamlined, not only
with more room to operate but
labor-saving, consistent with
ergonomics

Flexible Wind-bracing Frame

- **Foldable**: you can save space for transportation and storage
- **Detachable**: you can remove the independent frames from the panels when there is no need
- **Climbable**: you can climb the frames behind the panels for fast maintenance

Fast Rear Maintenance

The modular design allows fast rear maintenance of modules and power, ensuring efficiency and convenience of serviceability without disrupting system operation

XF Series

Purpose-designed Floor Display

- Stunning bearing load, up to 2.5T/m²
- Special bevel edge design for stage elevation
- Multiple sealed protection

APPLICATIONS

Concerts

Studios

Shows

Model	XF02
Pixel Pitch	2.9mm
LED type	3-in-1 SMD
Panel Size (W×H×D)	500mm×500mm×86mm
Panel Resolution	168 x 168
Ingress Protection	IP65
Maintenance	Front
Brightness (cd/m²)	1,200 cd/m²
Viewing Angle(°)	140°/140°
Input voltage(V)	100~240 V
Operation temperature & humidity(°C/RH)	20°C ~ 50°C/10~90%RH
Panel Weight	13.5 kg/panel
Contrast Ratio	10000:1
Gray Scale	14-16bit
Refresh Rate	3840/7680Hz
Input Power/Panel (Max/Avg)	120/40W

Intense Contrast

Dark-grey tempered glass finish allows a contrast ratio of **10000:1**, with 1200cd/m², 14~16bits and 3,840/7,680Hz, vivid color reproduction and stunning visual effects are guaranteed. The interaction between screens and lights makes the stage more shining and bright.

Comfortable Handle

- Comfortable large carrying handle with gears to limit place, easy to hold
- Two module handles for easy transport and installation

Change of Stage Elevation

Special bevel edge design ensures smooth transitions and prevents damage or collisions during the rise and fall of the stage.

Effective Protection

- Outdoor gluing solutions, high Ingress protection of **IP65**
- **7H-grade tempered glass**, easy to clean and scratch-resistant
- Metal-wrapped edges for better impact resistance

Dance Freely, Noise Free

Unique shock-free and buffer design for noise reduction and shock absorption, even dancing will not produce excessive noise.

Optional for Wall Screen

Equipped with magnetic side locks, the top and left locks are universally compatible for **quick transfer** between floor screens and wall screens, so the screen is fully utilized and helps clients improve ROI.

Remarkable Load Capacity

Adopting a multi-point support structure design, the bearing capacity reaches **2.5T/m²**, it can even park cars

Floor Screen Installation

1-in-1 and 2-in-1 frames for installation, with foot cups of adjustable height from 0 to 20mm, adapting all kinds of floor conditions.

Fast Maintenance

- Front maintenance of whole cabinet
- Modular design

- Separate hemming for efficient and low-cost maintenance

Efficient Thermal Management

Power supply unit

Integrated Die-casting molding

Heat dissipation rib

Increase heat dissipation area to accelerate the removal of heat from the panel

Stability with Dual Backup Design

Dual power supply
+
Dual signal backup

Soft Rubber Protective Sleeve

Silicone Soft Mask

Safety——Elastic protective sleeve safety design

Soft rubber protective sleeve and silicone soft mask design which can effectively slow down the impact of football or players on the screen and ensure players are protected from injury

Safety——Air switch protection design

Air switch protection design
Single-box power-off maintenance available to ensure personal safety;
Disconnection in case of current overload or short circuit.

Safety——Emergency door design

Emergency door design
Easy access for players and staff;
Quick evacuation through security doors in the event of an emergency.

Safety——Double Guarantee

Dual-backup of power and signal ;
Support remote real-time monitoring to ensure the normal and uninterrupted display of the screen and ensure the stable operation of the display.

Usport R Outdoor LED Ribbon Display

- Reliable and Extremely Stable
- Care-free Innovative Designs
- Professional Ribbon Solution

APPLICATIONS

Model	UsportR6	UsportR8	UsportR10

Weight(Kg/panel)	19.5kg		
Brightness(cd/m²)	6,500 – 10,000 cd/m²		
Refresh Rate(Hz)	3840		
Service Access	Top		
Contrast Ratio	(5,500-9,000):1	(5,500-9,000):1	(8,000-16,000):1
Ingress Protection	IP65/IP54		
Operation temperature & humidity(°C/RH)	-20°C ~ +50°C/10 ~ 90%RH		
Standard Mounting Configuration	-30°C ~ +60°C/10 ~ 80%RH		
Input Power (Max. W/m²)	650-800		
Input Power (Avg. W/m²)	217-268		

Reliable and Extremely Stable

Superior Water-proof Design

- IP65 for superior protection
- Fully enclosed waterproof design
- Hollow shell design
- Double-sided gluing design

Efficient Heat Dissipation

No fan power supply, close to back cover, efficient heat dissipation, high temperature resistance, more quiet

Practical Pulley Design

The four corners of the cabinet are designed with pulleys, which can accelerate installation with the top handles

UsportMAII

Gymnasium Cube Display Solution

- Top-class Immersive Viewing Experience with Dynamic HDR Technology
- Ultra Clear Image with 7680 Refresh Rate
- Enjoy events with No Visual Dead Zones
- Reliable with Ultra-high Stability
- Convenient Installation and Maintenance

APPLICATIONS

Ningbo Olympic Sports Center Gymnasium, China

Wukesong Culture and Sports Center, China

Chengdu Phoenix Mountains Stadium, China

Easy to Install and Rear Maintenance

Screw-on

The modules are connected with a row of pins, aligned with the box and then fixed with screws;
Rear maintenance, no wiring and gap adjustment required, effectively saving installation and maintenance time.

Electric Hoist

Winch

Stable and Good Heat Dissipation

heat sink rib design

- **Air plug design**
Power and signal cable connections are quick, easy and stable.

- **Power supply box heat sink rib design + fanless power supply**
Heat is introduced into the air through the radiating ribs, the heat dissipation effect is good, and the display effect is more stable;
Fanless power supply with no noise, no disruption to the game and viewing experience.

Umate PN

Fully Automatic & Highly Integrated Professional NPP

- Automated Production, excellent precision, higher efficiency
- No cable inside, receiving card and hub 2-in-1 design
- XYZ axis six-way adjustment for better flatness
- Support inner curve, right angle, half cabinet
- Support power supply and signal dual back-up
